## Professional Summary

ERPNext & Frappe Developer with experience in building and customizing enterprise ERP solutions. Skilled in backend automation, custom DocTypes, workflows, reports, integrations, and scalable system design.

## Core Skills

**Programming:** Python, SQL, Flow Language, HTML/CSS  
**ERP & Frameworks:** ERPNext, Frappe Framework, Frappe Cloud  
**Cloud:** AWS (EC2, S3, IAM, VPC, RDS), VMware  
**Databases:** MariaDB, MySQL, DynamoDB  
**Integration:** webMethods Integration Server  
**Tools:** Linux (RHCSA), GitHub, Shell Scripting, Burp Suite CE

## Experience

### IBSL-IT

Dec 2024 – Present

#### Junior Project Lead / Techno-Functional Consultant

- Designed and customized ERPNext modules (Procurement, Sales, Budget Management, Manufacturing, HR, Payroll).
- Developed automation scripts improving response time and reducing operational errors.
- Built custom query/script reports and dashboards using Frappe Insights.
- Conducted code reviews and VAPT following best practices.

### VKRAFT Software Services

Jun 2023 – Sep 2023

#### Integration Developer

- Implemented integrations using webMethods Integration Server.
- Optimized Flow Language services and resolved issues through debugging.
- Participated in technical training programs.

## Projects

**ERPNext Automation & Customization** – Developed custom workflows, email automations, DocTypes, reports, and dashboards.

**IFMIS (Integrated Financial Management Information System)** – Contributed to development for DDA(Delhi Development Board) in collaboration with BEL (Bharat Electronics Software Technology Centre), Bangalore. Integrated 23 applications (Aawas Yojana, Bhoomi, IDLI, etc.) to streamline financial and administrative operations.

- Developed IFMIS/Frappe modules for government workflows.
- Implemented budget allocation, transfer, and request workflows (HQ–Zone–Division).
- Created custom DocTypes, reports, and dashboards.
- Automated Payment Entry, approvals, and bank integrations.
- Developed backend (Python) and frontend (JavaScript) logic.
- Automated financial transactions and bank integrations.
- Improved security with 2FA and session management.
- Implemented RBAC(Role-Based Access Control.), validations, and security (2FA, session handling).
- handled payload encryption for data transfer.
- Debugged timestamp, permission, and workflow issues.

**ERP System – NDDDB (National Dairy Development Board)** – Developed ERP solution using ERPNext.

- Customized modules and implemented workflows (budget, payment, tenders, approvals).
- Created DocTypes, reports, and scripts using Python and JavaScript.
- Implemented validations and role-based permissions.
- Optimized performance and resolved backend issues.
- Collaborated with stakeholders for scalable delivery.

**AWS Web Deployment** – Hosted website on EC2 with Apache.

**Proctored Exam System** – Built system for detecting unauthorized exam activity.

## Education

**MET Bhujbal Knowledge City, Nashik**

Bachelor of Computer Engineering (Honors in Data Science), 2023

## Certifications

---

AWS Cloud Practitioner

AWS re/Start Graduate

Red Hat Certified System Administrator Training

Cloud Application Developer (NASSCOM)

## Activities

---

Event Manager & Technical Head (SAC Committee)

State & National Level Chess Tournament Participant (AICF)

NSS Community Service Volunteer
